BraKem

PRODUCT SHEET

KemiKoll

Chemical register, safety data sheets and compliance checks in one system.

99 SEK
per month, excl. VAT
14 days free · or 999 SEK per year

The chemical register is built from what you have already recorded - hazardous properties, location, exposure limit and other applicable rules per chemical.

What you get

Chemical register per AFS 2023:10
Always current, with clear markers for anything missing. Prints as a PDF or exports to Excel.

Labels and scanning on your phone
A QR label on every container and every location. Move and take stock with the phone's camera - no app needed.

Reports for inspections
Low stock, expiry dates and every safety data sheet gathered in a downloadable SDS binder.

Safety data sheets, monitored
AI finds and reads the sheets, and the system warns when the supplier has published a newer one.

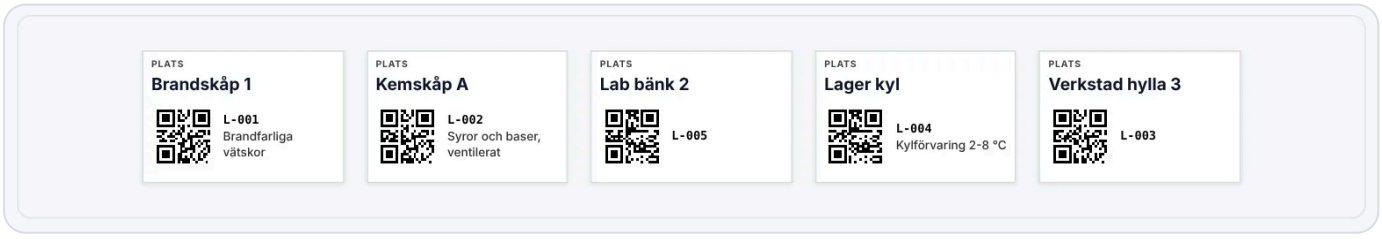

GHS labeling and risk assessment
Hazard pictograms and H/P statements per CLP, linked to risk assessments that are reviewed yearly.

BankID and permissions
No passwords to lose. Roles decide who may change things, and everything is logged.

Checked automatically against

- **Occupational exposure limits**
  AFS 2023:14 - over 450 substances
- **The Candidate List**
  Substances of very high concern (SVHC) under REACH
- **PRIO**
  The Swedish Chemicals Agency's database - over 19,000 substances

Substitution with a traffic light
CMR substances, sensitising products and phase-out substances are gathered in one list where you decide: approved, approved with conditions, or to be phased out.

Location labels: scan the shelf and then the containers, and the move is recorded.

Getting started

1. Enter your company details at brakem.se/InventorySystem
2. Add a card - nothing is charged for the first 14 days
3. Log in with BankID and import your current list from Excel

brakem.se/InventorySystem
info@brakem.se

Try it free for 14 days. One price per company, however many chemicals and containers you have. No minimum contract period.

The screenshots show sample data. The list check supports your work and does not replace your own risk assessment.
